

# Tree Health Warning Signs

Use this checklist to spot problems before it's too late.

**Leaves turning  
yellow or  
falling out of  
season**

**Dead or  
hanging  
branches**

**Bark that is  
cracked, loose,  
or peeling**

**Mushrooms  
or fungus at  
the base of  
the trunk**

**Woodpecker  
activity (could  
signal internal  
decay)**

**Holes in the  
trunk or  
branches**

**Leaning tree  
or exposed  
roots**

**Excessive  
sap or oozing  
spots**

**Reduced  
foliage or  
thinning  
canopy**

**Suckers or  
sprouts  
growing at  
the base**

If you check 2 or more of these, call us to help save your tree.
